

OmniDeck v1.0 Guide

The All-In-One Multi-System Analysis Indicator

What is OmniDeck?

OmniDeck integrates **10 distinct analysis systems** into a single modular indicator. Each system can be toggled independently, allowing you to customize your chart without indicator clutter.

The 10 Core Systems

1. TD Sequential

Exhaustion counter displaying numbers 1-9 above/below candles. Identifies potential trend exhaustion points when counts reach completion.

2. Squeeze Detector

Volatility compression identification system. Shows: - Compression dots when Bollinger Bands enter Keltner Channels - Directional arrows indicating potential breakout direction - Early warning of explosive moves

3. Liquidity Sweeps

Stop-hunt detection with visual markers: -  (Water droplet) - Bullish sweep (stops taken below support) -  (Blood drop) - Bearish sweep (stops taken above resistance)

4. EMA Trio

Three moving averages (50, 100, 200 EMA) with automated cross signals: - **GC** - Golden Cross (bullish cross) - **DC** - Death Cross (bearish cross) - **PB** - Pullback to EMA

5. SuperTrend

Trend ribbon overlay: - Green ribbon = Bullish conditions - Red ribbon = Bearish conditions - Automatic trend direction detection

6. BMSB (Bull Market Support Band)

Dynamic support zone combining 20 SMA and 21 EMA: - Acts as support during uptrends - Acts as resistance during downtrends - Popular for pullback entries

7. Regime Box

Background coloring indicating market direction: - Green background = Bullish regime - Red background = Bearish regime - Gray background = Neutral/ranging

8. Supply/Demand Zones

Automatically detected institutional zones: - Color-coded boxes (supply = red, demand = green) - Star ratings (★) indicating zone quality - Fresh vs. tested zone identification

9. Candlestick Patterns (RCS)

Recognizes **16 classic reversal patterns** with labels: - HAM (Hammer) - SS (Shooting Star) - BUE (Bullish Engulfing) - BEE (Bearish Engulfing) - And 12 more patterns

10. Meta Tools

Integration layer that coordinates system harmony and manages the Confluence Score.

Adjustable Settings

System Toggles

Each of the 10 systems has an individual On/Off switch. Enable only what you need.

Default Configuration: - Enabled: TD Sequential, Squeeze, SuperTrend, Regime Box, Confluence Score - Disabled: Others (enable as needed)

Color Settings (9 Groups)

Customize colors for:

| GROUP | OPTIONS |
|-------------------|--------------------------------|
| Trend Colors | Bull/Bear trend ribbon colors |
| Exhaustion Colors | TD Sequential bull/bear colors |
| Structure Colors | Supply/Demand zone colors |
| Squeeze Color | Compression indicator color |
| Warning Color | Alert/warning element color |
| Neutral Color | Neutral state color |

Confluence Panel Settings

| SETTING | OPTIONS |
|----------------------|--|
| Display Mode | Badge or Table |
| Panel Position | Top-Left, Top-Right, Bottom-Left, Bottom-Right |
| High Score Threshold | 1-10 scale |
| Low Score Threshold | 1-10 scale |
| System Weighting | Adjust importance of each system |

Pattern Detection Settings

- **Dynamic RCS Lookback** - Automatically adjusts 4-10 bars based on timeframe
- **Individual Pattern Alerts** - Enable alerts for specific patterns among the 16 available

Confluence Score

OmniDeck calculates a confluence score based on how many systems agree on direction:

| SCORE | INTERPRETATION |
|-------|--|
| 8-10 | Strong confluence - High conviction setup |
| 5-7 | Moderate confluence - Proceed with caution |
| 1-4 | Weak confluence - Wait for more alignment |

The score appears as a badge or table (configurable) showing real-time system agreement.

Visual Elements

OmniDeck displays these elements on your chart:

- **Numbered exhaustion counters** on candles (TD Sequential)
 - **Colored trend ribbons** (SuperTrend)
 - **Moving average lines** (EMA Trio)
 - **Background regime coloring** (Regime Box)
 - **Supply/Demand zone rectangles** with quality stars
 - **Candlestick pattern abbreviation labels**
 - **Confluence score badge/table panel**
 - **Liquidity sweep emoji markers**
 - **Volatility compression dots and arrows**
-

Recommended Configurations

Clean Setup (Minimal)

Enable only: - Regime Box (background context) - SuperTrend (trend direction) - Confluence Score (alignment check)

Pattern Trading Setup

Enable: - Candlestick Patterns (RCS) - Supply/Demand Zones - EMA Trio (for trend filter)

Breakout Trading Setup

Enable: - Squeeze Detector - Liquidity Sweeps - TD Sequential - Volume (from external indicator)

Full Analysis Setup

Enable all systems for comprehensive analysis (may be visually busy).

Tips for Best Use

- 1. Start minimal** - Enable only 2-3 systems initially
 - 2. Add gradually** - Turn on more systems as you learn them
 - 3. Watch confluence** - Higher scores = better setups
 - 4. Combine with other indicators** - OmniDeck works well with Volume Oracle and Janus Atlas
 - 5. Customize colors** - Match your chart theme for clarity
-

Alert Configuration

OmniDeck supports alerts for: - TD Sequential completions (count 9) - Pattern detections (16 patterns) - Squeeze releases - Liquidity sweeps - Zone touches

Set alerts via TradingView's alert system using "Any alert() function call" condition.
